OROL LEDDEN & SONS

THE LARGEST GROWERS AND SHIPPERS OF VEGETABLE PLANTS IN NEW JERSEY

SEWELL • NEW JERSEY

Store Opposite Pennsylvania Railroad Station

Bell Phone: Wenonah 400

OROL LEDDEN

WE ARE plant-growers and not plant-dealers. Every plant we send out is grown by us on our Sewell Farms. Only first-class plants raised from carefully selected seed will be sent out.

We ship annually thousands of mail orders to all states east of the Mississippi River. The bulk of our orders go into New Jersey, Pennsylvania, New York, Delaware, Maryland, Ohio, Virginia, and the New England States. Our careful packing, insuring good condition of plants, gives our customers the best satisfaction.

We have five large greenhouses heated by hot-water heat for early plants. These houses are devoted to growing pepper, eggplant, and tomato plants. Also, we have 1200 sash for coldframe beds for spotting or growing plants. The greater part of our plants are hardy, field-grown, planted and farmed by machine in 12-inch rows. These field-grown plants are strong and healthy, raised from the highest grade seed, and will give the best satisfaction.

All plants shipped will be carefully packed in moss, in cartons, boxes, or crates and sent by Parcel Post or Express.

We are located in our Stucco Store, on concrete road, opposite Sewell Station, 12 miles below Camden on the Pennsylvania-Reading Seashore Lines to Atlantic City.

We welcome customers and friends at our store and shall be glad to show our plants and seeds. To come by automobile—Camden or Gloucester to Woodbury to Mantua, left 2 miles to Sewell. From South Jersey

points, come by way of Glassboro, take Woodbury road, and turn to left at Sewell. Roads are concrete.

TERMS

Seeds and Supplies: Cash with order, otherwise shipment will be made C. O. D. **Plants:** Cash with order, no C. O. D. orders accepted. Remittance can be made by Check, Postal Money Order, Express Money Order or Registered Letter. You are protected by our safe delivery guarantee.

We guarantee all plants to be grown on our Sewell Farms. We grow plants from the best seed obtainable, and no seed that we know is of poor germination or inferior in any way is allowed to be sold.

The fact being well known that no reputable seedsman now guarantees seeds in any respect renders it unnecessary for us to say very much on this point, because it must be apparent to every intelligent person that no seedsman can

afford to send out poor or worthless seeds. There could be no more certain way of destroying his business.

While we exercise the greatest care to have all seeds, plants, and bulbs pure and reliable, we give no warranty, express or implied, as to description, purity, productiveness, variety, or any other matter of any seeds, plants, or bulbs that we send out; and we will not in any way be responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once and the money paid will be refunded.

All prices quoted in this Catalogue are subject to change without notice.

OROL LEDDEN & SONS

Safe Delivery Guaranteed

All plants and seeds are guaranteed to arrive in first-class condition, and if they do not, mail carrier or expressman should be notified on delivery. If damaged, request him to make notation of damage, sign, and mail to us at once, and more plants or seeds will be forwarded or money refunded.

Cabbage Plants *Plants ready May 1 to August 10*

Every year we grow large fields of Cabbage plants for kraut packers and farmers. We have shipped as many as 1,500,000 Cabbage plants in five days. Several sowings are made throughout the season in order to have plants the right age at any time during the season. We make it a point to have as healthy plants as possible and have all the leading varieties. We would advise gardeners to set out Cabbage plants two or three times—early varieties in May, second-early in June, late varieties in July.

Allhead Select. This is a great Cabbage and one of our best sellers. Head hard, slightly oval to flat in shape. One of the most used by kraut packers. We have sold millions of this variety to growers for kraut factories.

Chieftain Savoy. The crumpled-leaf variety, producing large heads. Should be planted in June, July, or August.

Copenhagen Market. An extra-early, good, round-heading, hard Cabbage, about one week later than Golden Acre.

Danish Ballhead. A very hardy, sure-heading, heavy variety which has proved to be one of the best keepers. A desirable Cabbage for kraut.

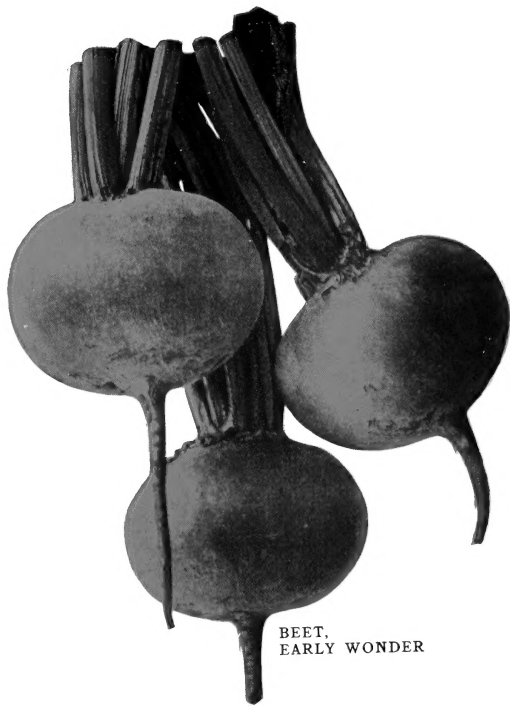

Early Jersey Wakefield. A very early, pointed-head Cabbage, compact and erect, with few outer leaves. Stem short; heads medium-sized.

Glory of Enkhuizen. Hard-heading, second-early, fine-grained. One of the best for kraut.

Golden Acre. This is the most popular early variety. Heads are of good size, perfectly round, solid, and very uniform and compact, having few outer leaves, which permits close planting. We have a very good strain from a reliable grower.

Late Flat Dutch. Enormous, flat head. Should be planted early in July as it requires a full season to head hard. Best late variety and also best winter keeper.

Marion Market. The heads are almost round and very solid. Early variety.

Round Red Dutch. Hard-heading red variety.

Winnigstadt. A good early variety. Very sharp-pointed heads. Used for early planting and also for planting late in July and August.

Wisconsin Hollander. A very good strain of Danish Ballhead. A good variety for storing or kraut packers.

Postage prepaid: 35 cts. for 25; 75 cts. per 100; \$1.20 for 200; \$1.90 for 500; \$2.50 per 1,000.

EGGPLANT, BLACK BEAUTY

CELERY, LEDDEN GOLDEN SELF-BLANCHING

Celery Plants *Plants ready June 20 to August 15*

Emperor or Fordhook. Plants stocky and compact; stems thick, round and of fine quality. Fine for late fall use and winter storage.

Giant Pascal. Grows large and is the leading late variety. Stalks are broad, thick, and solid. Extra good eating Celery; very brittle.

Golden Plume. A self-blanching Celery developed from Golden Self-blanching. Has been pronounced by authorities to be the best early variety. Blanches quickly and is very healthy.

Ledden Golden Self-blanching. Tall. The most popular and one of the best of all early varieties. For the past few years our stock has produced Celery of unexcelled quality and perfect growth. Everyone should raise this excellent variety. Stalks 26 to 28 inches tall, which blanch readily.

Sanford Easy-blanching. This good variety comes a little later than Golden Self-blanching and requires longer banking to blanch. Vigorous in growth and a splendid keeper.

Super Plume. New early strain of Golden Self-blanching. Very uniform, strong-growing type.

White Plume. An early Celery with beautiful white leaves in center. Blanches pure white. Liked by some better than Golden Self-blanching.

Winter King. A strong grower and one of the best keepers. Blanches white when banked.

Postage prepaid: 45 cts. for 50; 75 cts. per 100; \$1.20 for 200; \$2.50 for 500; \$4.00 per 1,000.

Tomato Plants

Plant May 1 to July 30

Tomato plants are our greatest specialty, and we believe we are the largest growers of Tomato plants in the United States. Canneries and large growers in New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, and Illinois obtain their plants from us every year. We have had single orders for a million plants and many unsolicited testimonials say, "Your plants were good and the Tomatoes produced from them were the best received at the factory."

Our plants are grown from seed treated with Semesan. We give quick service when plants are right size.

Bonny Best. Second-early variety that is liked by canners that grind their Tomatoes for soups or catsups. Tomatoes grow in clusters.

Certified Marglobe. A leading variety and used as the main crop by large growers. A second-early, solid, very meaty, thick red Tomato, that ripens well up to the stem, making it very desirable for canning or table use. Heavy yielder. All of our Marglobe plants are grown from New Jersey State Certified Seed.

Large Red Plum. Plum type. Larger and more blocky in shape.

New Stone. A good heavy Tomato for canning.

Ponderosa. A large purple Tomato, used in gardens.

Pritchard (Scarlet Topper). A heavy-yielding variety, about 10 days earlier than Marglobe. Vines are not as rugged as Marglobe and do not hold up throughout the season. Plants grown from New Jersey State Certified Seed.

Rutgers. This introduction by Lyman G. Schermerhorn, of the New Jersey Agricultural Experiment Station, is a leading development in Tomatoes. It compares in shape and size with the Marglobe but is slightly larger and a heavier yielder. The fruit ripens a deep red up to the stem, and runs very uniform in size. An excellent variety for home use, marketing, or canning. Canners who put up Tomato juice speak very highly of the variety, as it produces a juice which is deep red in color. All Rutgers grown from New Jersey State Certified Seed. Highly recommended.

Stokesdale. A good second-early variety. Fruits are globe-shaped, of good size. One week earlier than Marglobe. Plants grown from New Jersey State Certified Seed.

Yellow Plum. Small yellow plum-shaped. Used for preserving.

TOMATO PLANTS FOR TRANSPLANTING TO COLD FRAMES, ready March 20 to April 20—Valiant, Stokesdale, Marglobe, Rutgers, 90 cts. per 100; \$3.00 for 500; \$4.00 per 1,000, postage prepaid. Express or Parcel Post, f.o.b. Sewell, 60 cts. per 100; \$1.75 for 500; \$3.00 per 1,000.

FIELD-GROWN TOMATO PLANTS always give the best of satisfaction. Ready May 25 to July 15. Parcel Post or Express prepaid: 35 cts. for 25; 75 cts. per 100; \$1.30 for 200; \$2.00 for 500; \$3.00 per 1,000. Express or Parcel Post, f.o.b. Sewell, 50 cts. per 100; \$1.35 for 500; \$2.25 per 1,000. At store: 45 cts. per 100; \$1.25 for 500; \$2.00 per 1,000.

TRANSPLANTED (with block of dirt) TOMATO PLANTS, ready May 1 to April 15—Valiant, Stokesdale, Rutgers, Marglobe, at store, 70 cts. per doz.; \$4.00 per 100. These cannot be shipped by Express or Parcel Post but can be carried in boxes by auto or truck.

Pulling Tomato Plants

VEGETABLE SEEDS

WE LIST 200 of the leading and best varieties of seeds and take greatest care to secure only the best strains. Our seed is grown especially for us by the most reliable growers in various parts of the United States, so that it may be produced in the section that is best suited for the variety. For example, our Lima Beans are grown in California; Beans, in Idaho; Cantaloupe, in Colorado; Corn, in Connecticut; Onion sets, in Illinois, etc. Contracts with growers are placed twelve to eighteen months before the seed is to be delivered or before the seed-grower plants the seed stock. This is done to secure only fresh and highest quality seeds for our customers.

Orol Ledden, Sr., who has devoted thirty-nine years to the seed business and has been a plant-grower all his life, probably is better acquainted with the farming industry and the gardener's problems than any other man in the seed business today. We say this because he was born and reared

on a large farm in Gloucester County, New Jersey; his father was a farmer and grew plants and seeds. He owns and operates two large farms and other farmland totaling about 300 acres. He has experimented with all of the varieties of vegetable seeds listed in this book and has grown them on a commercial scale. He is therefore well acquainted with their individual characteristics.

We endeavor at all times to secure the highest quality seeds obtainable and to offer these high standard seeds at minimum prices. No seed is allowed to be sold that we know is poor in germination or in any way inferior.

We prepay transportation charges on all of our seeds except quarter bushels or more of Beans, Corn, Onion Sets, and Peas at bushel rates. For prepayment of these, please add 1 cent per pound to the price. This enables our many mail-order customers to secure Ledden's Seeds at no extra cost. No charge is made for packing or package.

Half-ounce sold at ounce rate; 1/2-pound sold at pound rate; 1/4 or 1/2-bushel sold at bushel rate

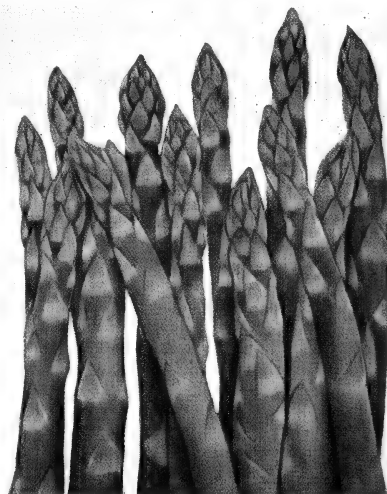

Asparagus *Sow in March and April*

Mary Washington. The best variety of Asparagus. It is a selected strain, earlier and more vigorous than other varieties, producing fat, delicious stalks abundantly and regularly. This is the famous rustproof variety produced after many years' effort, and is completely free from rust and other fungous diseases which harass the life of many Asparagus growers. Quality is of the highest. Oz. 10 cts.; 1/4 lb. 35 cts.; lb. \$1.00; 5 lbs., 90 cts. per lb.

ONE TO TWO YEARS CAN BE SAVED BY THE PLANTING OF ASPARAGUS ROOTS. IT TAKES THREE YEARS FROM TIME SEED IS SOWN UNTIL ASPARAGUS CAN BE CUT.
WE OFFER ROOTS ON PAGE SIX

SPERGON, the New Seed Protectant developed by the United States Rubber Company, is a complex organic chemical in yellow powder form. It is used in treatment of seed to eliminate the hazard of fungi (damping-off) in the soil. Because it has the unique property of great adherence to seed, it is easily applied by a simple mixing operation. It can be used also in all types of soils. 2 ozs. 40 cts.; lb. \$2.50, postage prepaid.

CITY OF PORTLAND

WYOMING

CANNAS

We have made a specialty the past few years of growing quite a quantity of the most popular large-flowering varieties of Cannas. We offer both the bulbs and the potted plants (potted in 3½-inch pots and ready during May, June, and July) at very attractive prices.

Canary. Canary-yellow flowers. Green foliage. Height 3½ feet.

City of Portland. Beautiful pink flowers. Green foliage. Height 3½ feet.

Gladiator. Yellow flowers, splashed with red. Light green leaves. The bizarre, oriental coloring is most attractive. Height 4 feet.

Golden Eagle. Golden yellow flowers. Green leaves. Makes a fine massed bed, of a brilliant shade effective in sunlight. Height 4 feet.

Hungaria. Large pink flowers. Green foliage. Height 3½ feet.

Kate Gray. Deep orange flowers. Green foliage. Tall growing. Height 5 feet.

Meteor. Bright red flowers. Glossy green leaves, similar to President. A good bedding variety. About 3½ feet high.

President. Large, brilliant scarlet blooms. Glossy green leaves. This is probably the most popular variety because of its excellent habit and brilliant shining color. Height 4 feet.

Red King Humbert. Dark red flowers. Glossy deep brown leaves. Height 4 feet.

Wyoming. Large spikes of orange flowers. Dark bronze leaves. One of the tallest varieties suitable for back rows or the center clumps of large plantings. Height 6 feet.

Yellow King Humbert. Large, golden yellow flowers, dotted with red spots. Leaves are light green. An old timer but scarcely to be surpassed by more modern varieties which have challenged its supremacy. Height 4½ feet.

BULBS: 10 cts. each; 75 cts. per doz.; \$5.00 per 100; \$40.00 per 1,000, postage or express prepaid. 5 cts. each; 50 cts. per doz.; \$4.00 per 100; \$35.00 per 1,000, f.o.b. Sewell, N. J.

PLANTS: 10 cts. each; \$1.00 per doz.; \$7.50 per 100. No orders are taken for shipment of potted Canna plants.
